Abstract

HeNNFAQ is a information site where teachers and students can get answers about the eLibrary system deployed in their school by Help Nepal Network. These frequently asked questions will be an effective way to solve the problems in absence of other resources(books and volunteers).

Chapter 1

Introduction

HeNNFAQ is a information site where teacher and student can get answers about the eLibrary system deployed in their school by Help Nepal Network.

1.1 Background

HeNNFAQ is a information site where teacher and student can get answers about the eLibrary system deployed in their school by Help Nepal Network. This website is developed in localhost server and runs offline. Web page contains question answer collection regarded the Help Nepal Network, E-Library installation, deployment, configuration and maintenance which will help teachers and students to search their problems and solve them immediately.

1.2 Objective

Following are the objectives of developing the webpage:

- 1: Provide answers to the problems related to E-Library faced by the teachers and students.
- 2: To reflect basic principles of Human Computer Interaction in this website.

Chapter 2

Time Schedule

2.1 Time Division

<i>Phases</i>	<i>Duration</i>
System analysis and study	15 Days
Design & Coding	30 days
Integration	10 Days
Testing and Troubleshooting	5 Days
<i>Total</i>	<i>2 Months</i>

Chapter 3

Conclusion

Completing this project, teachers and students using e-Library system provided by Help Nepal Network will be benefited. They can solve their problems in absence of HeNN volunteers. The need not to be stuck in a small error which could be solved within a few minutes.

Likewise this project will be our first web page which follows every principle of human computer interaction.
